

BREAKING NEWS

GERMAN made for AUSTRALIAN conditions

At GHA we've enhanced Dormakaba's frameless glass Stacking and Bi Fold systems with new end caps for full sealing from top to bottom for external applications.

We've improved the trolleys for stability reducing the need for maintenance and service calls. In addition we've reintroduced the bottom guide channel with newly designed bottom guides.

GHA cuts all top and bottom rails to size. We carry all the Dormakaba stock off the shelf enabling us to provide a comprehensive service for your frameless glass projects creating shorter lead times.
